Decentralized Lending Pools

Decentralized Lending Pool

- Depositors send funds to a smart contract
- Depositors receive passive income
- Borrowers draw funds from the pool by setting a collateral
- Borrowers can return the funds anytime
- Lenders can withdraw anytime if there are funds
- All transactions handled via smart contracts
- Interest calculated per block

DLP Protocol

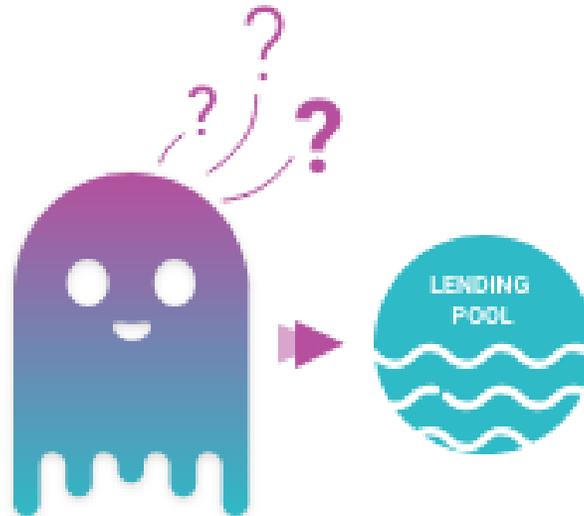

- “Anyone” can become a “bank” and create a DLP
- Liquidity providers can join your DLP
- DLP Host can set initial parameters for the DLP
- Enables transparency and competition
- DLPs can organize themselves through governance capabilities

Governance

Governance of the Pools

- One of the most important thing is to govern the pool parameters

PROTOCOL

Market or Governance based rates ?

Voting Weight

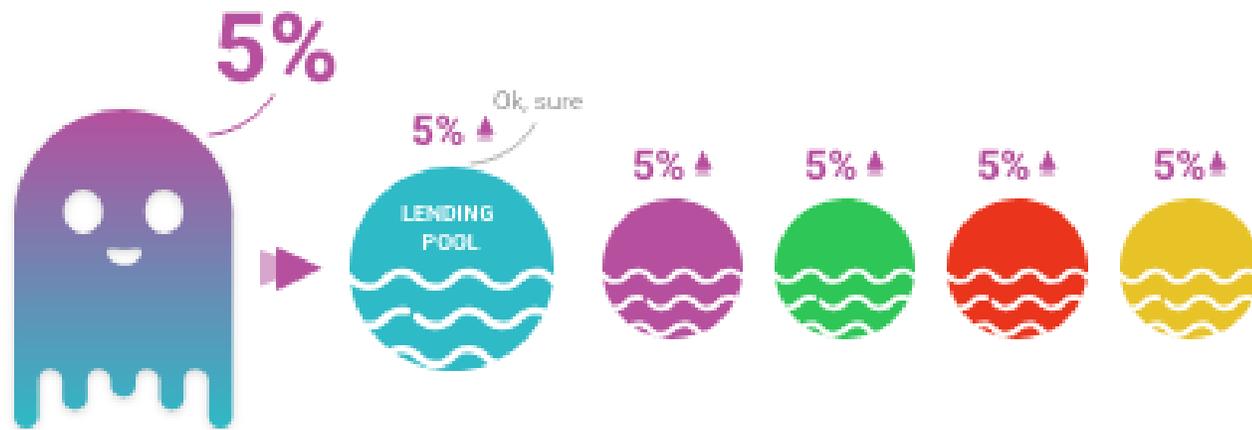

- Fair
- Inclusive
- Make Sense

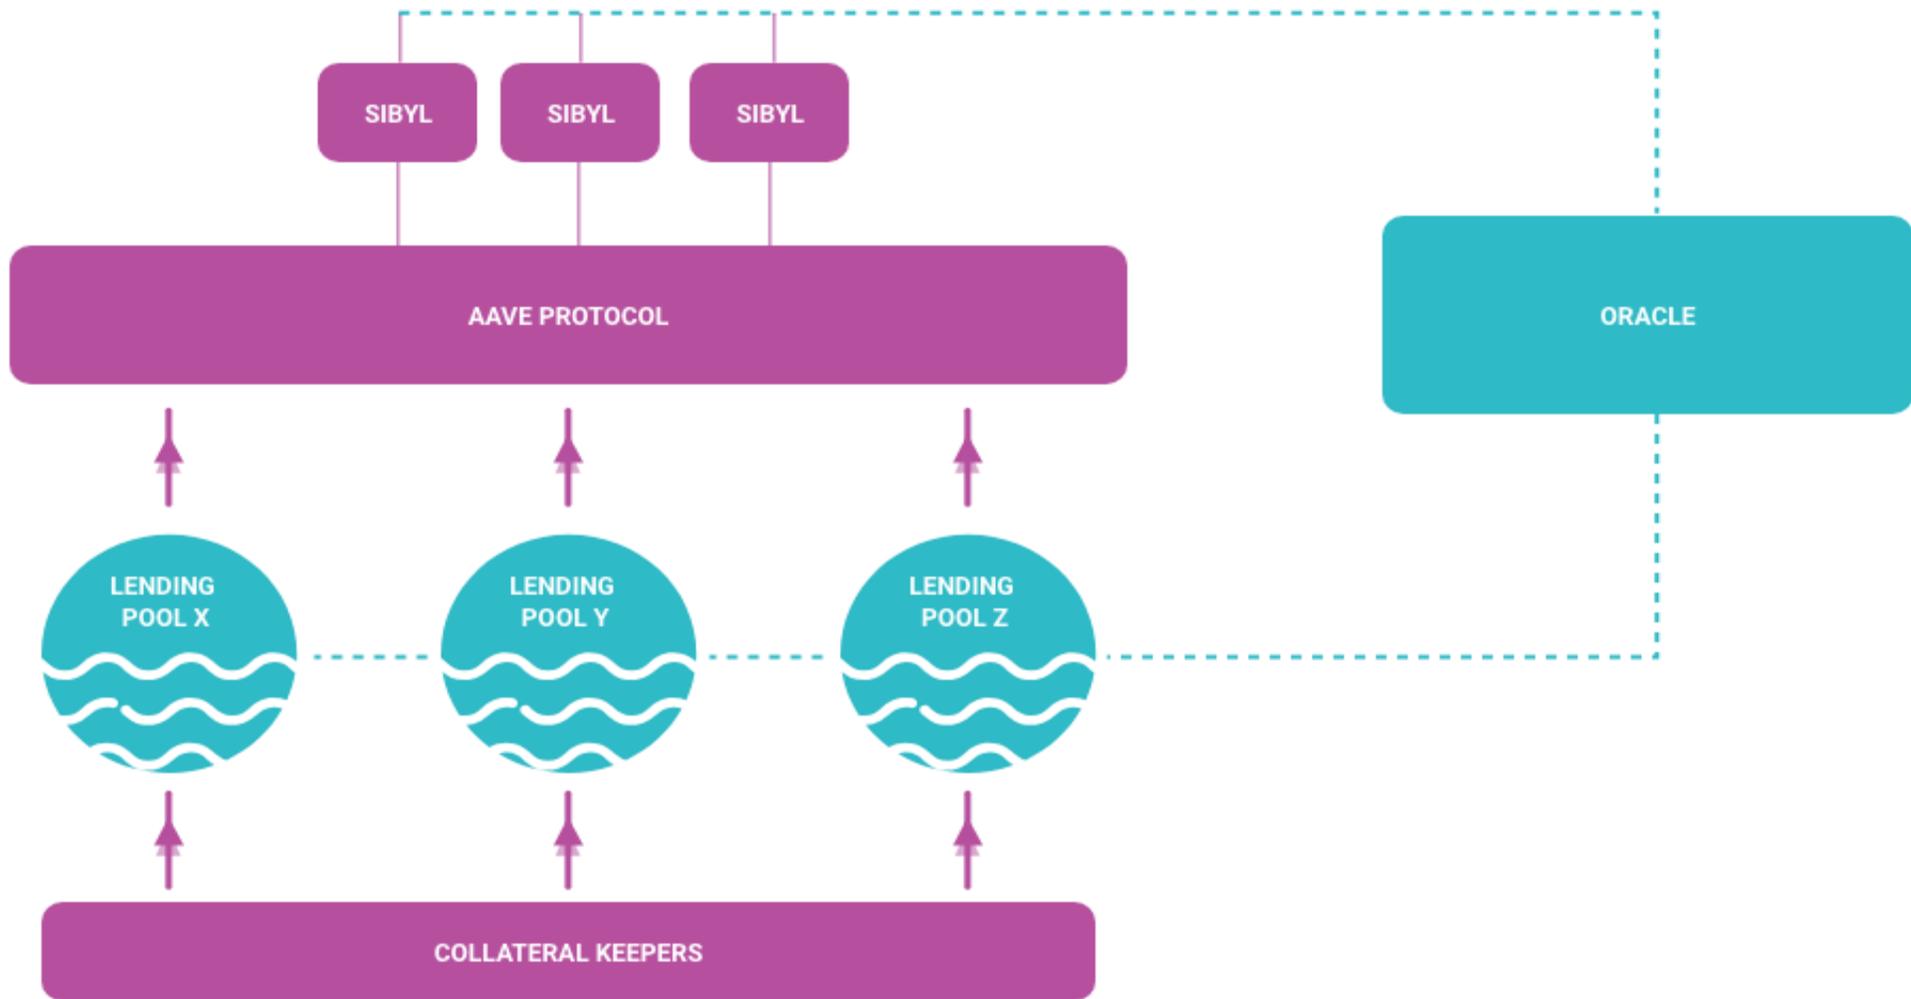

Voting

- Assets Prices
- Accepted collaterals
- Medium of Exchange
- LTV
- Margin call discount
- Closing the pool
- Cost of Voting

Governance of the Protocol

- Protocol wide voting enables cooperation between pools and token holders

Voting

- Smart Contract Update
- Minimum amount to create a pool
- New interest strategy
- Adding a new sybil
- Community Proposal

Work in Progress
